

**'KNOWLEDGEABLE AND PERFORMANCE MINDED'**

# GCB Wireless Services, Inc.

**GCB** is a California-based general contractor (GC) specializing in the telecommunications industry's wireless services. Our primary focus is site development/construction, site maintenance and LNA installation. We have a GC license and are **bonded and insured** for CA, OR, and WA. And, we're approved vendors for the major project management firms, national carriers and major antenna site companies.

Keeping safety first and foremost, we employ:

- Certified Aerial Lift Operators
- Certified Anritsu Sweepers (are also certified climbers)
- Certified in DragonWave, Motorola, and BridgeWave
- Microwave Pathing - experienced & trained
- Path Survey - experienced & trained
- Certified Climbers
- PIM Certified
- Certified Welders
- Certified in PPC & Cisner
- AT&T UMTS - experienced & trained

In addition to the above, all of our construction project managers have vast experience in the wireless construction industry. To enhance **GCB's** total service concept, we maintain a variety of sub-contractors ranging from HVAC, generator repair, excavation/underground boring to tree surgery and hazardous material removal to assist you with your antenna site needs.

By offering total customer satisfaction and keeping safety first, **GCB** is focused on being the premier site development and maintenance company in the Western States. Available 24/7, **GCB's** knowledgeable personnel will work with your operations and site construction staff to ensure site deployment successfully rolls out a manageable task.

## **GCB WIRELESS SERVICES, INC. COMMITMENT**

**SAFETY** - Leading the tower industry through our commitment to Safety, while continuing our fast and economical site development performance is paramount. Training, regular inspections and audits are the key to our success in our risk management efforts. All of our individuals are certified and trained in the safety procedures required for their trade. All GCB employees who are required on a job site have been trained in Site and RF Safety. Additionally there is a safety meeting everyday before work starts. Our audits and inspections along with conscientious attention to safety details is the most effective tool we have for creating and maintaining a safe working environment which is free from recognized hazards. Safety and health in the work place is every employee's responsibility and at GCB, we take this responsibility seriously.

**QUALITY** – At GCB Wireless Services, Inc. we are client focused, always striving for total customer satisfaction and excellence in every project we undertake. Accordingly, our methods follow a simple formula for success: Solid Planning, Responsive Client Service, Knowledgeable & Experienced Professional staff and Post-Project Review. Following this formula yields measurable rewards in the form of client satisfaction, and overall cost effectiveness. We devote significant time to planning a project while creating a detailed scope of work. Our experience has found that research leads to appropriate design solutions and lets us set an approach which is less likely to require subsequent modifications. Clients are involved in our project planning process from the inception, so we can learn as much as possible about their expectations, assess existing conditions, and identify unusual circumstances which may affect the work.

**SERVICE** – At GCB Wireless Services, Inc. value added service is paramount in our efforts for total customer satisfaction. Achievement is afforded by providing quality workmanship with a sensitivity to financial realities while constantly being responsive to the needs and requests of the client. Our commitment to responsiveness has always been equal in importance to the design solution itself. All of our staff is equally accountable for ensuring timely and successfully complete projects that will meet the needs of our clients. This requires a streamlining of communications as well as a staff that understands each part of the process. It also creates an environment where project revisions and/or scope changes are readily accepted and acted upon by all of the team members.
